ONLINE MEETINGS WITH TOP MEXICAN PORK PRODUCERS & KEY EXPORTERS

WHY JOIN?

Mexico is an important producer within the Food & Agro Business, not least when it comes to pig production. The big Mexican pig producers have 80-100.000 sows, and their fast-growing production is fully integrated to include both farms and slaughterhouses. The big pig producers invest heavily in new solutions and technologies to meet the rising demand from their home- and export markets and some of the companies are planning to scale-up the production with additional 10.000 sows a year.

The objective of this virtual concept is therefore to match Danish companies delivering new solutions and technology with some of the biggest Mexican pig producers.

THE EXPORTS CATALOGUE

In order to arrange the B2B meetings at the most relevant level you will need to fill in a company profile. The exporters' catalogue will work as your selling platform and the Mexican companies will use it to select the Danish companies they want to meet and decide if they are interested in an online B2B session.
